DAVTRON MODEL D811C

40 Years of Reliability... Upgraded. Aviators Desk Clock

40 years ago, Davtron designed and manufactured our 811 series clock for aircrafts. This 811 series clock was installed in Air Force One aircrafts SAM 26000 and SAM 27000. Davtron clocks have been installed on all Air Force One planes since 1974. With over 40,000 811 clocks in the field, the 811 series remains in production today. We are offering a desk version of this historic clock to proudly display in your home or office. With this clock's long esteemed history, it will surely be a topic of conversation for those not necessarily sitting in your cockpit.

DAVTRON MODEL D811C

40 Years of Reliability... Upgraded. Aviators Desk Clock

There are four 811 Series clocks installed on Air Force One aircrafts SAM 26000 and SAM 27000. The location are as follows: pilot, co-pilot, and one on each side of the flight deck.

The SAM 26000 is at the National Museum of the United States Air Force at Wright-Patterson AFB near Dayton, Ohio. This aircraft entered service during the administration of John F. Kennedy in 1962, it was later replaced in 1972 and to then be used as backup.

The SAM 27000 entered service in 1972 and for the next 29 years was used as the primary aircraft for seven US Presidents: Richard Nixon, Gerald Ford, Jimmy Carter, Ronald Reagan, George H.W. Bush, Bill Clinton and George W. Bush. This Aircraft's final resting place is at the Ronald Reagan Presidential Library, Reagan being the president with the most miles flown on this Air Force One. Visitors to the library have the opportunity to see this aircraft first-hand which is on loan from the United States Air Force. President Ronald Reagan has often been regarded as one of the most influential US presidents of our time. With each glance at the 811 Series Aviators Desk Clock, you will not only read the most accurate time, but will also be reminded of a significant time in our history.
